Heat From The Sun

# IT'S ALL ABOUT EMOTION

Drawing on a variety of sources, Appleseed has created its own individual style that goes beyond alternative rock. The band always uses improvisation to create new songs.

Appleseed band was founded in Poznan, Poland. From the very beginning their sound was inspired by the greatest bands of 70's and current alternative rock bands. In 2006 Appleseed recorded its first (EP) "Broken Lifeforms". It wouldn't be possible without core members who were in the band almost from the beginning (Bartek Bak, Maciej Hoffman, Wojciech Deutschmann) and frontman (Radosław Grobelny) who directed the band to the right path and created unique atmosphere of Appleseed. The bass guitar sound was created by Natalia Brzozowska. The EP got positive reviews in Poland, as well as abroad. The song "Twin World" was selected for CD "Thirty something new Tales from PL/ PT" - compilation of 26 bands from Poland and Portugal. The same song achieved number one on Pro-Rock.pl music chart. In early May 2007 Appleseed performed live on the 'PiK' Polish Radio's studio in Bydgoszcz. In September 2007 the band released first official videoclip for the LP's song "Lullaby". 2010 brought another significant milestone, the LP "Night In Digital Metropolis" recorded with new bassist Filip Bielecki. Soon the band's line-up was expanded to include the keyboard player Wojciech Ślepecki.

At the beginning of 2014 Appleseed recorded new LP "Heat From The Sun" and promo videoclip "Far Away". New LP received very positive reviews in Poland and abroad. In 2020, a new frontman Krzysztof Podsiadło (former singer of Abstrakt) was invited to join the band for new LP recording expected in 2022.

Appleseed has always attached great importance to improvisation and live music creation. They had the opportunity to gig with many great artists such as Riverside (PL), Snowman (PL), Russian Circle (US), Shaky Hands (US), Johnny Young (UK), Ray Wilson (UK) and more.
